OKLAHOMA HAY MARKET REPORT

5-23-25

Receipts: 640 Last Reported: 80 Year Ago:2,130

Everything is unchanged compared to the last report. The prices remain steady, and demand is at a standstill. Rain continuously covers Oklahoma, preventing hay producers from moving hay and, at times, stopping the alfalfa crop from being harvested. We still don't see an end in sight for cattle sales. The continued preparation for the new crop of grass hay is underway as well. The availability of grass hay is still high when it comes to supply across Oklahoma.

Trends: Alfalfa Large rounds & squares \$130-\$150 a ton - 2024
Grinding hay - No Trend

Bermuda 5x6 rounds - \$70-\$90 a bale - 2024

Bermuda 5x6 rounds - \$50-\$55 a bale - Year Old Hay

Bermuda Large Squares - No Trend

Wheat Hay 5x6 Round and Large Squares - \$80-\$90 a Ton - 2024
Grass Hay 4x5-4x6 - \$45-\$55 a bale - 2024

Grass Hay 4x5-4x6 Unfertilized hay - \$25-\$35 - 2024

Grass Hay 5x6 - No Trend Rough Grass

Hay any size \$25 a bale - Year Old Hay

The Oklahoma Mesonet Drought Monitor shows that 0 percent of the state is in exceptional drought, 0 percent is in extreme drought, 2.99 percent is in severe drought, 11.94 percent is moderate, 15.52 percent is abnormally dry conditions, and 84.48 percent has no drought conditions.

*** The next report release will be on June 6th ***

Oklahoma Production Cost Report (Bi-Weekly)**5-16-25**

Compared to last report: Urea took another big jump in price. UAN prices have stabilized, largely because available supply has already been contracted and additional supply won't be available until July. Demand very good for all fertilizers. This week's hot temperatures, reaching into the mid 90s, have accelerated wheat maturing across the region. As fields begin to turn, harvest preparations are underway. Farmers are servicing combines in anticipation of harvest, all while monitoring storm forecasts that could threaten yields. Farm Diesel and Propane remain steady.

Oklahoma Retail Feed Cost Report (Monthly)

5-5-25

Compared to last report: Feed prices were variable as feed stores lock in summer months pricing. USDA forecasts 94.0 million acres of corn will be planted in the US, that is up 3.4 million acres from a year ago. Feed prices will adjust based on yields harvested this fall. Many farmers in Oklahoma have already planted corn only to see fields flooded this week. April 2025 is the wettest April in Oklahoma City history with 12.5 inches of rain. Eastern Oklahoma has received as much as 19 inches of rain for April. Feed demand has decreased as the grass is growing with the vast amounts of rain received. Sale barns are at historically high prices. Cattle futures continue to remain strong.
